Results

Program: 12-Week, 36-visit Remediation program using sensory, motor, and academic exercises

Results:

1. **Academic:** Greater than 2 years in grade level performance improvement in all domains (on WIAT), except math reasoning.
2. **Behavioral:** "81% were considered to no longer be demonstrating ADD/ADHD behaviors, based on the Brown Scale."
(Int J Adolesc Med Health. 2010 Apr-Jun;22(2):275-83. ([PMID: 21061929](#)))

Although we cannot guarantee results, we expect no less than 50% improvement. Typical improvement is 60-80% at 3 months and additional improvement for those who do the follow-up 3-month program.
